SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	03/27/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No.	Applicant(s)	
	10/661,145	GEORGE ET AL.	
	Examiner	Art Unit	
	Sunit Pandya	3714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 31 January 2007.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-62 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-62 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

This action is in response to Request for Continued Examination filed 12/22/2006. Where claims 1-62 are pending, and wherein claims 1 and 32 are amended.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paulsen et al. (US Patent No. 6,712,698)

Regarding claims 1-7, 32-37, Paulsen discloses a gaming system for processing an alert, comprising a host computer coupled to a remote terminal or a remote computer, said remote computer being connected to the host computer via a network such as the Internet, for Exchanging data between the host and the remote computer wherein the remote device allows user to acknowledge the alert and responsively inform the host computer, wherein if the user causes a mistake a display may light up or start flashing red light, or create an audio alert of sort (play music, or pulsate), thus allowing the user to acknowledge the alert and response to the host computer regarding the alert, 21: 27-51 and 29: 15-30. Paulsen further discloses gaming machines utilizing

audio graphics to issue alert, 1: 34-47, and 15: 19-29. Components such as music, sounds and Paulsen discloses using wireless connection such as IEEE 802.11 standard, IEEE 802.11b, IEEE 802.11g to couple the remote device to the remote network interface, 3: 43-60, 11: 35-63.

However Paulsen does not disclose of a receiving device being a mobile computer. It would have been obvious to one having ordinary skill in the art at the time the invention was made to include a receiving device being a mobile computer easily carried by the computer user, since it has been held that making an old device portable or movable without producing any new and unexpected result involves only routine skill in the art, see *In re Lindberg*, 93 USPQ 23 (CCPA 1952).

However Paulsen also does not teach of sending a selectable form of alert to the user or allow the user to select the alert, or display the selected alert to the user. However at the time the invention was made, it would have been obvious matter of design choice to a person of ordinarily skill in the art to allows the user to select the alert from multiple alert system (i.e. the alert could be music, sound, message) thus allowing the user to feel in control of the game and thus adding to the excitement of the game, because the applicant has not disclosed that adding selectable alert forms, provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinarily skill in the art, furthermore, would have expected applicant's inventions to perform equally well without given multiple different types of alert (music, or sounds or messages). Therefore it would have been an obvious matter of design choice to modify Paulsen to obtain the invention as specified in claims 1 and 32.

The disclosure of Paulsen has been discussed above and is therefore incorporated herein. Regarding claims 8-31, 38-62 Paulsen discloses providing data including a form, as shown in Fig 3E, but lacks in disclosing an alert form. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide such feature since it has been held that the provision of suitability, where needed, involves only routine skill in the art. Such feature would heighten player's interest and/or draw patron's attention, 1: 33-46. Paulsen discloses providing web interface allowing view of web pages, for interaction with a user and further discloses acquiring input from users, formatting and presenting data to users, 4: 39-47, 6:17-25. Paulsen discloses allowing access to certain information to users according to user's roles, 30: 61-67, 31: 1-2. Paulsen discloses providing an audio Layout in each interface and including a button for selecting by the user to send alert notification, 6-7: 61-31. Paulsen further discloses checking for information validation and displaying messages to users according to received information, 32: 8-12. Paulsen further discloses providing an alert button, 15: 15-30 but Lacks in disclosing the alert button being a refresh button. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the provided button of Paulsen as a refresh button, since it has been held that the provision of suitability, where needed, involves only routine skill in the art. Paulsen discloses tracking time, date, Location of events and further discloses displaying text to describe messages, 32: 8-12.

Response to Arguments

Applicant's arguments filed 12/22/2006 have been fully considered but they are not persuasive.

The applicant argues that Paulsen does not disclose a remote device or a method for processing an alert as set forth in amended independent claims 1 and 32. The examiner respectfully disagrees with the applicant. As stated in the rejection above, it is shown that Paulsen discloses a gaming system for processing an alert, comprising a host computer coupled to a remote terminal or a remote computer, wherein remote computer is connected to the host computer via a network such as the Internet, for Exchanging data between the host and the remote computer wherein the remote device allows user to acknowledge the alert and responsively inform the host computer, wherein if the user causes a mistake a display may light up or start flashing red light, or create an audio alert of sort (play music, or pulsate), thus allowing the user to acknowledge the alert and response to the host computer regarding the alert, 21: 27-51 and 29: 15-30, and also 3: 43-60, 11: 35-63.

The applicant also argues that Paulsen does not disclose a remote device being a mobile computer carried by the user. The examiner respectfully disagrees with the applicant and would like to bring the applicant's attention back to the rejection above for details regarding the mobile device.

Consequently, for the reason provided above the rejection is maintained.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See Notice of References cited page.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sunit Pandya whose telephone number is (571) 272-2823. The examiner can normally be reached on M - F: 8 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pezzuto can be reached on (571) 272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
